

SIDELINE II

The SS2 sideline is a low-cost frame system constructed of fluted polypropylene that stacks efficiently. It offers quick setups with an easy fold design. The design not only locks the frame in place, but also adds rigidity to the frame. The frame system is modular in 34" h x 48" w increments.

A quick slide u-pin allows connecting multiple frames together to create a 4' or 400' wall in no time. It's a much lower cost frame than the padded system currently on the market.

PRICING

SIDELINE II FRAME
